

Safe Classroom Email?...it does exist!

If you are looking for a safe, inexpensive way to provide email accounts to your students, then Gaggle is the solution for you!

Over 12,000 schools have signed up for Gaggle's secure email system. The system is designed specifically for K-12 schools and is easy to implement across all levels of your district.

How Does Gaggle Work?

Gaggle.Net makes email safe, because it gives the educator complete control. Messages with unfriendly and offensive language or visual depictions of pornography are routed to the educator first for review. Because Gaggle is a fully customizable solution, you can decide which words and phrases are inappropriate for your students. You can also setup rules to control exactly who can and cannot communicate with your users.

Because Gaggle is web based, mail can be accessed through any browser, from any internet-connected computer. Students can read their mail at home, in the classroom or in the library.

At Gaggle.Net Our Mission Is Simple:

Provide schools with a safe and controlled environment to allow student communication, collaboration, and learning in the classroom, at home, and around the world.

Three Service Versions!

1. Free Version
2. Subscription Version
3. Licensed Version

Gaggle is a Priority 1 E-rate eligible service.

New Technologies and Higher Levels of Compliance

Gaggle has taken CIPA Compliance very seriously with new and cutting edge technologies:

- APS (Anti- Pornography Scanner)
- Filtered Digital Storage Locker
- Email/Text Filtering
- Virus Protection
- Spam Protection
- Monitored Message Boards
- Teacher Controlled Chat Rooms
- POP3/SMTP Access
- Online Spell Checking
- Basic Web Hosting and Profile Pages
- School and Classroom Calendars

Developing Safer Communication Tools for Our Schools

NEW APS TECHNOLOGY!

Gaggle's new Anti-Pornography Scanner (APS) actively scans the content of attached and embedded images and distinguishes the difference between appropriate and inappropriate pictures. Compressed files and URL's are also checked for pornographic content.

Gaggle.Net has extended the APS technology to analyse, on the fly,

any URL's that are included in the email message body. This ensures safety for all web related activities.

The Gaggle.Net APS is based on technology used by the FBI to track online child predators. This technology not only scans for skin tones, but uses several advanced mathematical algorithms, allowing Gaggle to lead the way in the development of safer communication tools that achieve higher levels of CIPA compliance.

Email is Educational

A special kind of learning takes place when students interact via email. Beyond writing and typing activities, other successful curriculum projects include:

- Daily Media Projects
- Email Mentors
- Electronic Pen Pals
- Subscribe to the Daily Newspaper via Email
- Chat Room on Current Events
- Character Impersonations

Free Version

Over 12,000 schools have already signed up for the free version of Gaggle.Net. This version is available for teachers to demonstrate to the district that student email can be safe and provides valuable learning opportunities.

The free version provides 2.5 megabytes of storage space per user and is supported by advertisers. All advertisements are screened for inappropriate content.

Subscription Version

When districts subscribe to Gaggle.Net, they receive all of the benefits and services of our free version, without the advertising and with increased storage space of 25 megabytes per user.

Hosting Gaggle on Your Server

Your school or district also has the option to purchase its own Gaggle software to be hosted on your internal network license. Gaggle technicians will remotely install and configure the system on your hardware. Multiple schools can be setup and run from the same system, giving you a central point for all system management.

Support, Service and Implementation

Gaggle's staff of email experts is dedicated to supporting your school throughout the implementation process, from preplanning, to account creation, to successful program utilization. Call: 1-800-288-7750 to talk with any of our customer service personnel.

Gaggle.Net Pricing

The Gaggle Subscription Version can be purchased for as low as \$ 2.50 per user. It has all of the advanced features that you would expect from a full service email provider. Prices are based on the number of users in a school district including, students, faculty, staff, and administrators.
